The Nature Foundations

Why do we own reserves and land with great nature value?
What makes us different?

- Set goals that differ considerably from what other private and public landowners can.
- 100% focus on nature conservation, research and nature interpretation.
- Objectives set apart from earnings and policy goals.
- Generate projects and catalyze processes based on ownership of land or financial support.

Legislation – opportunities and limitations

Conservation Act for Lille Vildmose (Dec. 2017):

- secure and improve the overall landscape
- ensure favorable conservation status on designated nature habitats and species
- ensure public access
- allow for the release of exterminated indigenous species in order to reestablish a more natural dynamic
- eventually open up the possibility of connecting the three existing fenced areas in one
- ensure the possibility of nature restoration in accordance with the above objectives

Fun-facts and acknowledgement

Sept. 2011 - now

- Kick-off seminar (Jan. 2012)
- Int. Celebration (20 years - LIFE and the Habitat Directive) (May 2012)
- Public meetings and special workshops
- Advisory Board (6 meetings)
- Local Focus Group (10 meetings/inspections)
- Steering Committee (21 meetings)
- Project Group (56 meetings)
- Technical meetings/inspections (100+)
- Platform meetings and participating in other LIFE-seminars (10 meetings)
- Guided visits/events/speaks (60+) – participants ca. 5.500 pers.
